The Bill

The bill or (a) bill. Material to be used, examined or inpected and improved uopn:

Use of a Utensil.

(A) Cellulose measure.

(B) A Radioacitve Isotope or live Neutron property.

(C) Large mamal ability to calculate and interpret Fungus and use of Structure.

(D) Accurate numbers of Definite 'use'

Bills are inspected disscussed and a procedure is the method of a discussion or debate.

Asslembly or other practice to put together a useful source of Placement and reference.

The Act

A material used for the norm, logic, or agreement on a specific cirumstance a or an accepted action. Decisions and formula to take the place of Artificial technology. In the event of a failure in electronics, natural disaster, or violence.

Acts are inspected disscussed and a procedure is the method of a discussion or debate.

Asslembly or other practice to put together a useful source of Placement and reference.

Notes:

Atoms and Binary measure of Surface area and resource relative to Calculated measures.

Dimensianal properties and the Decimal-Dimensional Rule to figure accurate measures to brand new resources like cements and particle boards.

Nucleic and Organic Measures to rule Human interactions.

The Boundaries of a area:

Volume - Make up

Signature conductivity

Provision

Time and rules

Phase:

Nano measures and Time

Pysical measures to a 5 dimensional - rule

3 - 5 and the metric properties in a time frame for the use of resource and conductivity

Exposure and the air .0023 and the organic 156 measure to consumation of nuclear measures and metals for trade as currency and time.

Define man and the expediture of nature for a boundary and signature.

Scale to define work duty and Fares or also imports or exports of resources and trade agreement.
